

**To whom it may concern**

I hereby confirm that DTU's Bachelor of Science in General Engineering as well as all of DTU's Master of Science degrees are completely taught in English.

I can therefore confirm that a student admitted to any of these study programmes has an adequate level of English to complete academic studies taught in English.

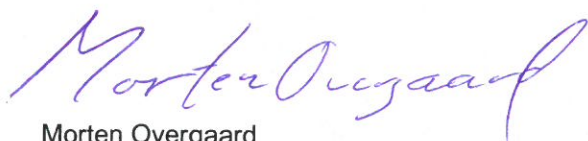

The student's minimum level of English is that being equal to the B-level from a Danish high school, which is a requirement for every full-time student admitted to DTU.

A student with a B2 proficiency level in English is according to the Council of Europe a student who:

- Can understand the main ideas of complex text on both concrete and abstract topics, including technical discussions in his/her field of specialisation.
- Can interact with a degree of fluency and spontaneity that makes regular interaction with native speakers quite possible without strain for either party.
- Can produce clear, detailed text on a wide range of subjects and explain a viewpoint on a topical issue giving the advantages and disadvantages of various options.

Please do not hesitate to contact DTU International Education for any questions or concerns.

Best regards,

A handwritten signature in blue ink that reads 'Morten Overgaard'.
